CENTRE FOR ARTIFICIAL INTELLIGENCE

Internship Assignment: Full Stack Development

Deadline: Sunday, 18 October 2026, 11:59 PM IST

Submit

The link to your hosted application and the link to your GitHub repository. AI tools are allowed, but you must be able to explain everything you submit.

The Situation

An office handles requests from many people across several campuses. It runs on campus-wise Excel sheets, email and WhatsApp. It is messy: files get lost, nobody knows which version is latest, requests get recorded under the wrong campus, and requesters keep asking where their request stands.

- **Requesters:** many people, some new to this. Several visit or call the office for help, and some bring printed papers.
- **Coordinator:** one staff member who handles everything and should spend their time on real work, not forwarding files and messages.
- **Specialist:** one external expert, around 50, who does not use email and is comfortable with WhatsApp. The office has decided they must move to a new system.

The Process Today

1. A requester sends their details (name, campus, department, title, category, other people involved, amount) and documents.
2. The coordinator records it and checks the documents. If something is missing, they ask the requester.
3. The coordinator sends it to the specialist on WhatsApp. Replies for all requests arrive mixed in one chat.
4. If a document has a problem, it goes back and forth between the requester and the specialist, through the coordinator, several times.
5. The coordinator tells the requester the outcome, gets their confirmation, and marks the request complete.

What to Build

A working web app with a login and separate pages for each of the three roles. At minimum, a request should travel from a requester, through the coordinator, to the specialist and back, with each role seeing only what it should. Add demo users (coordinator, specialist, and two requesters from different campuses) and a few sample requests.

The Home Page

Present this text on the page visitors see before logging in. You may restructure, shorten or visualise it, but every fact must stay correct.

Requests Office: Information for Applicants

Anyone with an organisation email can raise a request, from the main, north or city campus. You will need your name, campus, department, a short title, the category, names of other people involved, and the amount if any. Attach a signed covering letter, a short description, and any quotations or invoices. Files must be readable and under 10 MB. The office checks your request within 2 working days and may ask you to correct things more than once. Some requests go for expert review, which takes up to 7 working days. You never deal with the expert directly. When a decision is made, you confirm you have seen it, and only then is the request closed. The office is open Monday to Friday, 9:30 AM to 4:30 PM, closed on public holidays. For help, visit or call 080 0000 0000.
